

AMENDMENT TO THE ABSTRACT

The following abstract will replace all prior versions of the abstract in the application:

ABSTRACT

A clamp device including a support frame member, a lower clamp unit and an upper clamp unit supported by the support frame member. The lower clamp unit has a pair of lower jaws and a first actuating means actuator for actuating at least one of the lower jaws between clamped and unclamped positions. The upper clamp unit has a first upper jaw and a second upper jaw, and a second ~~actuating means~~ actuator for actuating ~~at least one~~ or more of the upper jaws between clamped and unclamped positions, the first upper jaw being fixed for movement with one of the lower jaws.
